

Inox Riva - Applications

Chemical, Petrochemical and Pharmaceutical

The chemical, petrochemical and pharmaceutical market consists of a diverse range of industries, each with their own needs and their own production processes.

From acids to dangerous organic solvents, from the production of polyethylene and polypropylene to the production of primary pharmaceutical chemicals, INOX RIVA is your specialist partner with our wide range of products.

We supply Couplings, Valves, Fittings and Tubing which are applied on plant lines or directly into systems and devices for control and regulation. We are able to respond to individual requirements, whether it is linked to Filtration Systems, Machines for the homogenization, Drying Systems, to the use of autoclaves and many more.
